

# TECHNICAL ENGINEER

Ruapehu offers an enviable lifestyle based in one of the most beautiful locations in New Zealand, with access to the Tongariro World Heritage Park and the Whanganui National Park, providing fantastic activities at your doorstep.

The Ruapehu district is a great place to live, work and play with affordable real estate and easy access to major cities.

Skiing on half days off, cycling, kayaking, fishing or walking after work are some of the activities you have easy access to.

We would like to hear from applicants who feel they can provide a fresh approach to the development of our unique district.

- ▶ This Technical Engineer position works closely with Council's water services operations contractor, Veolia, to ensure the successful delivery of the water services functions across the district. You will build and maintain strong relationships with Council's waters' customers and contractors.
- ▶ Reporting to the Environmental Manager, variety is key to this role which includes customer service, contract supervision, project management, asset management and monitoring. You'll travel the district and become familiar with all of its nooks, crannies and many gems.
- ▶ Applicants should have experience in water services, wastewater treatment or similar industry, particularly in the area of the water, wastewater and storm water infrastructure.
